## CIJA ENERGY SERVICES

CIJA Energy Services is a leading indigenous Oil and Gas services company with a major industrial and technology edge in EPC (Engineering, Procurement and Construction). CIJA Energy services was incorporated under the companies and allied matters act of 1990 with its cooperate head office in Port Harcourt, Rivers state, Nigeria. We specialize in providing Engineering and Technical services, procurement, Oil well chemicals to the Nigerian Oil and gas industry and other allied companies.

CIJA Energy is built on integrity, trust and impeccable discipline towards service delivery; we have gained strong international and local reputation as one of the leading Oil and gas service providers in Nigeria.

At CIJA Energy Services Limited we are committed to delivering excellent service through our customer-focused drive where the customer is at the centre of our business.

## MISSION STATEMENT

CIJA Energy Services is committed to being the best and most reputable oil and gas service company providing Value for money, quality services to our clients whilst ensuring job security and satisfaction for employees.

## VISION STATEMENT

To become the premier oil and gas service company in the world that has a reputation for quality service and integrity in all business activities.

# PRODUCTS AND SERVICES

## WELL SERVICES

We provide specialist well engineering services related to well construction, maintenance and production optimization activities. We provide the following well support services.

## PUMPING AND STIMULATION

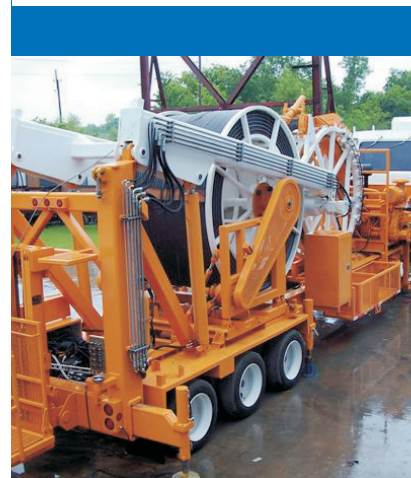

We provide miscellaneous and pressure pumping operations like well bore cleaning, pressure equalization, well kill and various types of fluid pumping operations. We carry out wellbore stimulation like acidizing, fracturing, xylene/diesel displacement and solvent soaking, de-waxing etc. We have single and double skid high pressure triplex plunger pumps to carry out all the above pumping operations.

## COILED TUBING AND NITROGEN

We offer a complete coiled tubing and nitrogen services to our clients. Our innovative approach aimed towards intervention services on coiled tubing and nitrogen are modeled towards Re-vamping well and reservoir performances.

We offer technical advice based on oil and gas well challenges on the choice of coil tubing size to use for optimal delivery of quality services.

CIJA owns various software packages like Cerberus; for modeling of coiled tubing forces, torque and drag analysis of the string.

Coiled tubing & nitrogen services offered by CIJA include:

- Well activation
  - Sand wash
  - Wellbore Clean out
  - Solvent soak
- Acid Stimulation

## SLICKLINE SERVICES

With qualified personnel and up to date equipment we are constantly looking at ways to improve excellence in our slick line services. We also provide technical and professional advice on challenges faced down hole. Some of the slick line services we offer are;

- Well completion
  - Gas lift valve change out
  - SCSSV change out
  - Well plugging/abandonment
  - BHP & Temperature survey
  - Sand bailing operations
  - Swabbing operations
  - Tubing investigations
  - Well reactivation
  - Zone change
- Fishing operations

## MISCELLANEOUS PUMPING

We carry out all forms of miscellaneous pumping operations in land, swamp and offshore locations.

We are experts in;

- Well kill
- Pressure equalization
- Xylene/diesel displacement
- Pressure testing of tubing/annulus
- Pumping to flow station
- Tubing/annulus fill up

Pressure Pumping to set packer/completion

## CEMENTING/REMEDIAL SERVICES

CIJA provides various types of cementing pumping operations for mainly remedial operations. We can execute cement plugs for isolation, side track or abandonment and squeeze operation. We also design the slurry to meet the rheological needs of the client. We assist our clients with technical advice on how we can positively execute these operations safely, professionally and with excellent service delivery guaranteed.

## FILTRATION

We provide filtration services for different kinds of operation; we formulate and filter brine for wellbore use, it can be used for completion or well kill. We supply different sizes of filter cartridges and diatomaceous earth materials for any filtration operation.

## WELL HEAD SERVICES

We execute various types of well head maintenance operations such as well head completions operations. We work on different types of well head like Vetco gray, Kvaerner etc. We carry out xmas tree testing, valve refurbishment, installation and retrieval of BPV.

## WASTE MANAGEMENT

We provide field environmental and waste management services such as water based mud treatment, remediation, sediment evacuation, supply of coral barge, mud /waste skips for evacuation of drill cottons. We carry out all operations with standard safety procedure.

## WELDING AND FABRICATION WORKS

Our Facilities allow us to carry out a wide range of fabrication projects ranging from pipeline production facility maintenance, Tank Fabrication, pipeline fabrication, construction and all Structural fabrication. CIJA provides specialized services including Laying of oil and gas pipelines, pipeline repair and pigging. We also carry out Hydro test to check the integrity of our fabricated spools using the relevant ASME standards.

## ELECTRICAL/INSTRUMENTATION AND CONTROL

Our instrumentation services include Installation and Calibration of instruments, instrument fitting, Pipe Line Leak detection Using Continuous and non-continuous leak detection technique, hook up to the HMI, construction and testing of electrical switchboards, marshalling cabinets, control cabinets and industrial process automation .

CIJA provides specialist Offshore and Onshore Electrical, Instrumentation and control support services.

We carry out, SCADA and PLC Programming: Functional studies, programming (ABB, Siemens, Quantum, Rockwell, Yokogawa, Invensys Wonder ware, Allen Bradley), site installation, pre-commissioning and commissioning.

The HVAC and pressurization services we provide include custom-designed and built industrial air conditioning and climate control systems.

CIJA is an ISO 9001-2008 compliant company for electrical, instrumentation and control systems for the oil and gas and other allied industries.

## PROCUREMENT AND SUPPLY

CIJA energy procurement department specializes in the procurement of mechanical and electrical maintenance materials, well head equipments, valves, instruments, oil well tools and industrial chemicals for the major international and national exploration and production companies, gas production and power plant operators in Nigeria.

Our team of specialists provide advice to clients, negotiate and procure parts and materials from manufacturers and vendors at the best possible price and ensures requirements are delivered timely to the client's site.

In our warehousing facilities in Port-Harcourt we conduct quality controls checks on all equipment procured before delivery to clients.

## GENERAL MAINTENANCE AND COMMISSIONING

We specialize in maintaining our clients' production facilities so that they operate at minimum cost and uphold the highest safety and environment standards in the industry.

Our thorough knowledge of all the major types of oil and gas plant, equipment and components ensure otherwise disparate and specific Maintenance activities can be consolidated, coordinated and managed by a trusted independent partner.

Our maintenance service is a comprehensive, specialized activity that starts with understanding the plant and its processes, together with the objectives of the owner. Effective maintenance increases the 'up -time' for production.

## HSE(HEALTH, SAFETY AND ENVIRONMENT)

Our HSE management system is organized in such a manner as to concentrate on the behaviour of personnel and teaching the processes that allow people to empower themselves to effectively plan, control and improve their individual team performance.

Our HSE management system is made up of the following key elements.

- HSE leadership and commitment
- Organization, responsibilities, resources, standard and documentation
- Planning and procedures
- Hazard and effect management process
- Implementation and process monitoring
- Audit
- Review
